[Absolute Plastics LLC – Announces Downsizing at Plant – Wilson, NC](#)

Absolute Plastics, LLC – Wilson, NC – Absolute Plastics recently announced its intention to reduce its manufacturing footprint in Wilson, NC. The decision is due to changing customer demands.

The company will align operations with the current and future needs of our customers and with our other production facilities in CA, MO and VA.

The Wilson facility employs approximately 130 people and produces polypropylene and PET take-out packaging for the casual dining restaurant industry. Production is expected to decline in early 2018. We will continue to operate the Wilson facility with reduced production and as a central distribution facility.

The reduction will initially affect less than 50 of the current employees over a 2 month period beginning in January 2018. The decision is being announced in advance of the downsizing to provide employees with as much notice as possible, to support them through this process and to ensure a seamless transition for our customers.

Absolute Plastics is a subsidiary of rePlanet Holdings, Ontario, California. rePlanet operate various businesses in the recycling and packaging industries.
